About B Corp Certification

Measuring a company's entire social and environmental impact.

<https://www.bcorporation.net/en-us/certification/>

Certified B Corporations are leaders in the global movement for an inclusive, equitable, and regenerative economy. Unlike other certifications for businesses, B Lab is unique in our ability to measure a company's entire social and environmental impact.

B Corp Certification is a designation that a business is meeting high standards of verified performance, accountability, and transparency on factors from employee
--

benefits and charitable giving to supply chain practices and input materials. In order to achieve certification, a company must:

- Demonstrate **high social and environmental performance** by achieving a B Impact Assessment score of 80 or above and passing our risk review. Multinational corporations must also meet baseline requirement standards.
- Make a **legal commitment** by changing their corporate governance structure to be accountable to all stakeholders, not just shareholders, and achieve benefit corporation status if available in their jurisdiction.
- Exhibit **transparency** by allowing information about their performance measured against B Lab's standards to be publicly available on their B Corp profile on B Lab's website.
